

Введение

Автоматически тесты были созданы с помощью программы Ghost Inspector.

Тестирование было произведено на 2х версиях браузера – на Firefox 75 и Chrome 81.

Расписание автоматического прогона тестов – раз в день.

Полученный результат — это скриншот окончания прогона теста.

На скриншотах указаны шаги прогона тестов. Программа автоматически выполняет заранее прописанные действия и проверяет выставленные утверждения. Если на каком-то шаге возникла проблема и утверждение не было подтверждено, то данный шаг отмечается красным цветом и работа теста прекращается, а на почту присылается уведомление об ошибке.
